range specification corner protection and bollards

Round Post Bollards

600 mm high, 50 mm or 75 mm diameter bollards finished, galvanised, bright chrome or polyester coated.

Available in stainless steel on special request. Corner protection posts and angles can be produced in a variety of sizes and finishes to suit customer's individual design requirement for both interior and exterior use including warehouse, loading bay and car park areas.

Corner Protection

Nutek produce a range of corner protection units to suit all applications.

Angle Corners

Floor mounted mild steel corner protection with a choice of internal or external fixing points. Available finished galvanised, bright chrome or polyester coated.

Nutek reserve at all times the right to amend specifications and dimensions as part of our ongoing programme of product development.
