Industrial Protection Rail

a robust low level protection rail

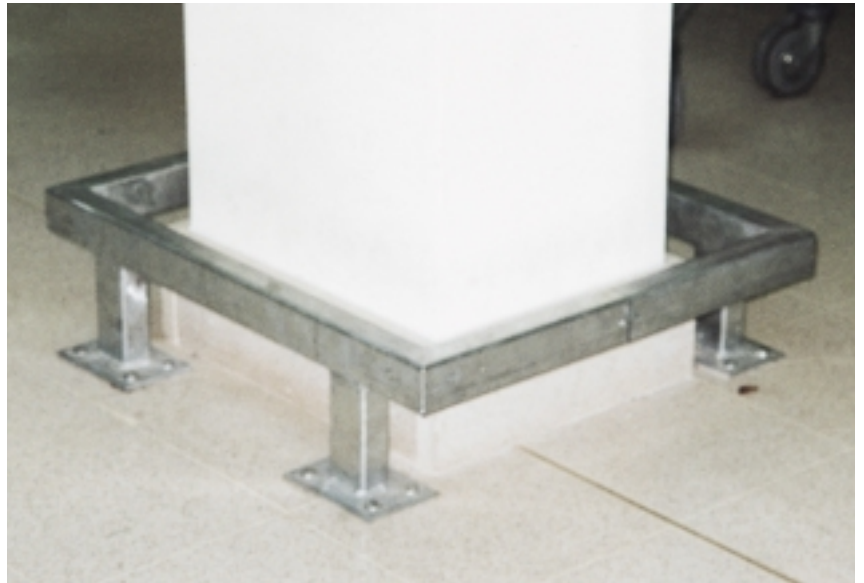

A robust low-level protection rail manufactured from galvanised 60 x 40 x 3 mm mild steel. Suitable for interior and exterior use.

Our strong welded foot gives superior impact support.

Nutek's modular design makes this system ideal for damage protection use in warehouse areas, loading docks and around columns.

As a manufacturing company Nutek can fabricate matching sections for those difficult areas such as ramps and drain pipe protection.
